February 2024

Dear Families,

As you are aware, your child will be taking part in a government online "Multiplication Tables Check" in June this year. In November, we provided you with a leaflet explaining the check. This can also be accessed via our website, and those of you who were able to attend our 'Christmas in the Classrooms' event will have been given a short presentation of what the check entails by your child's class teacher.

The national curriculum expectation is for primary school children to know all their times tables up to 12 X 12 by the end of Year 4. Times tables knowledge is vital for quick mental maths calculations and problem solving in everyday life, as well as for many of the topics children learn in Years 5 and 6 (division, fractions, percentages).

Over the past few months, the children have been working incredibly hard both at school and home to increase their fluency and recall of times tables facts. They have recently taken part in the spring term 'Times Tables Rock Stars' unofficial online check. This allows staff to check and assess the children's progress at this point in the year and implement any intervention we feel may be required to allow all children to fulfil their potential. As a school, we're pleased to report that the vast majority of children have made good progress since they were last assessed in October. Your child's result from October and January is shown in the box below.

If you have any questions regarding your child's result, the official check or ways you can support at home, please don't hesitate to contact your child's class teacher.

Thank you for your support.

Mrs Hastie
